What Big Sporting Events Leave Behind

By Sunny · 2026-09-14 · 211 words · L3

국제 대회가 도시에 남기는 것

Every few years, a city gets chosen to host a major international event such as the Olympics or the FIFA World Cup. Millions of visitors arrive, and the world watches closely. But what happens when the games are over and everyone goes home?

A City Transformed

To prepare for a big event, cities usually build new stadiums, airports, and transport systems. These projects cost a lot of money, but they can make a city much easier to live in for years afterward. Many cities have used this chance to update old neighborhoods and connect areas that were hard to reach before.

The Problem of Empty Stadiums

However, some facilities become difficult to use after the event ends. A stadium built for 80,000 fans may sit mostly empty when there is no major team to fill it. Cities like Athens and Rio de Janeiro have faced this problem. Large venues were abandoned because there was no long-term plan for them.

Many urban planners believe that cities must think carefully about what will happen to each building after the event is finished. When there is a clear plan, facilities can become schools, community centers, or public sports spaces. With good planning, even the biggest events can leave something truly useful behind.

올림픽이나 월드컵 같은 대형 국제 행사를 개최하면 도시의 교통망과 시설이 크게 발전할 수 있다. 그러나 아테네와 리우데자네이루처럼 장기적인 활용 계획 없이 지어진 경기장들이 행사 후 방치되는 문제도 발생한다. 전문가들은 경기장 등의 시설을 학교나 지역 공간으로 재활용할 수 있도록 사전에 철저한 계획을 세우는 것이 중요하다고 강조한다.

The Hidden Art of Translating Words

By Sunny · 2026-09-14 · 135 words · L1

번역가가 고민하는 말맛

Translating a language is not just about changing words. Sometimes, a word or phrase in one language has no clear match in another. This makes a translator's job very difficult.

For example, the Korean word 'nunchi' means the ability to read a room and understand people's feelings quickly. English has no single word for this. A translator must choose a phrase that gives readers a similar idea.

Humor is also hard to translate. A joke in one language often does not work in another because it depends on cultural background. Translators must rewrite the joke so it feels funny to new readers.

This creative skill is called 'transcreation.' Good translators do not just move words from one language to another. They carry the feeling and meaning across, so readers in any language can truly understand.

Why Subscription Services Are Growing Fast

By Sunny · 2026-09-14 · 118 words · L1

구독 서비스가 늘어난 이유

These days, many companies offer subscription services. You pay a small amount every month, and you get music, movies, food, or other things regularly.

Subscription services became much more popular during the COVID-19 pandemic. People stayed home, so they started using streaming services like Netflix and Spotify. These services were easy to use and felt good value for money.

Companies also love subscriptions because they get steady money every month. As a result, more businesses started offering them. Even some restaurants now offer monthly subscription plans.

However, many people now pay for too many subscriptions at the same time. This is called 'subscription fatigue.' Experts say people are starting to choose more carefully which services they really need.

한글 요약

코로나19 팬데믹을 계기로 넷플릭스, 스포티파이 등 구독 서비스가 크게 인기를 끌었으며, 기업들도 안정적인 수익을 위해 앞다투어 구독 서비스를 도입했다. 하지만 너무 많은 구독 서비스에 동시에 가입하는 사람들이 늘어나면서 '구독 피로'라는 현상이 나타나고 있다. 이에 따라 전문가들은 소비자들이 자신에게 꼭 필요한 서비스만 골라서 이용하는 방향으로 변화하고 있다고 분석한다.

WORDS & MEANINGS

subscription	구독, 정기 결제	value	가치, 값어치
regularly	정기적으로	fatigue	피로, 지침
pandemic	전염병의 대유행	expert	전문가
streaming	스트리밍 (인터넷으로 영상·음악을 실시간 재생하기)	offer	제공하다
steady	꾸준한, 안정적인	carefully	신중하게, 조심스럽게

Why Are Teens Skipping Breakfast?

By Sunny · 2026-09-14 · 191 words · L3

아침을 거르는 청소년들

Many teenagers around the world are starting their school day without eating breakfast. Researchers say this is becoming a serious health concern for young people.

A Growing Habit

Studies show that a large number of adolescents, or teens between the ages of 10 and 19, regularly skip their morning meal. In some countries, more than half of teenagers do not eat breakfast before school.

Why It Matters

Breakfast gives the body energy and helps the brain focus during morning classes. When teens

skip it, they often feel tired and find it harder to concentrate on lessons.

Researchers have also found that teens who skip breakfast are more likely to eat unhealthy snacks later in the day. Over time, this can affect their weight and overall health.

So why do so many teens skip breakfast? Many say they are too tired in the morning or do not have enough time before school. Some also say they are simply not hungry.

Health experts recommend that teens eat a balanced breakfast every day. Even a small meal, like fruit or whole-grain bread, can make a big difference to both energy and focus.

한글 요약

전 세계 많은 청소년들이 아침 식사를 거르는 습관이 늘고 있으며, 일부 국가에서는 절반 이상의 청소년이 등교 전 아침을 먹지 않는 것으로 나타났다. 아침 식사를 거르면 수업 집중력이 떨어지고 불건강한 간식 섭취로 이어져 건강에 부정적인 영향을 줄 수 있다. 건강 전문가들은 과일이나 통곡물 빵처럼 간단한 것이라도 매일 아침 식사를 할 것을 권장하고 있다.

WORDS & MEANINGS

Can AI Job Interviews Be Fair?

By Sunny · 2026-09-14 · 140 words · L1

AI 면접은 공정할 수 있을까

Many companies now use AI to interview job applicants. The AI watches a person's face, voice, and words, and then decides if they are a good fit for the job. But is this system fair?

Researchers have found that some AI tools treat people differently because of their name, race, or gender. For example, one study showed that people with white-sounding names sometimes received higher scores than others with the same skills.

This happens because AI learns from old data, and that data can include unfair patterns from the past. So the AI can repeat those same mistakes without knowing it.

Some experts want stricter rules to check AI tools before companies use them. Others say humans should always make the final decision. The question of how to make AI interviews truly fair is still being discussed around the world.

한글 요약

많은 기업들이 지원자의 얼굴, 목소리, 말하는 내용을 분석하는 AI 면접 시스템을 도입하고 있다. 그러나 연구에 따르면 AI가 이름, 인종, 성별에 따라 지원자를 불공정하게 평가하는 문제가 발견되었으며, 이는 AI가 과거의 불공정한 데이터를 학습하기 때문이다. 전문가들은 AI 도구에 대한 엄격한 검사와 인간의 최종 판단이 필요하다고 강조하며, 공정한 AI 면접을 만들기 위한 논의가 전 세계적으로 이어지고 있다.

WORDS & MEANINGS

applicant	지원자	data	데이터, 자료
interview	면접, 인터뷰	pattern	패턴, 양상
fair	공정한	decision	결정
system	시스템, 체계	strict	엄격한

Cities Are Bringing Their Rivers Back to Life

By Sunny · 2026-09-14 · 135 words · L1

도시 하천을 되살리는 공사

Many cities around the world are working hard to clean up and restore their rivers. For years, pollution and concrete walls along riverbanks made urban rivers dirty and unsafe. Now, local governments are changing that.

Some cities have removed concrete from riverbeds and let water flow naturally again. This process is sometimes called 'daylighting,' and it helps fish and plants return to the water. Clean, natural rivers can also help reduce flooding.

In several European cities, river areas have been improved so that people can safely enjoy them for swimming and relaxing. In the United States, some buried streams have been uncovered and turned into green spaces for communities.

These projects show that rivers can recover if people take care of them. Healthier rivers also improve air quality and bring wildlife back to city areas.
