Make Fun Shadows With Light!

By Leo · 2026-08-24 · 74 words · L2

그림자놀이는 어떻게 만들까

Do you like shadows? You can make them!

You need a light and your hands. A lamp or a torch works well.

Put your hand in front of the light. A dark shape shows on the wall. That is your shadow!

The light cannot go through your hand. So it makes a dark shape. Isn't that cool?

Try making a dog or a bird. Move your fingers and the shadow moves too. So fun!

Why Are Soap Bubbles Always Round?

비눗방울은 왜 둥글까

Do you like soap bubbles? They float and shine!

A bubble is made of soap and water. Air gets trapped inside.

Why Round?

A round shape uses the least soap. So bubbles always go round!

The outside of a bubble is very thin. It pulls in tight on all sides.

Wow — every bubble makes the same shape! Isn't that cool?

Why Do Birds Sing Every Morning?

By Leo · 2026-08-24 · 73 words · L2

새는 왜 아침에 노래할까

Birds sing in the morning. They do this every day!

Morning is a good time to sing. The air is quiet and still. Sound goes far in quiet air.

Birds sing to talk to other birds. They say, 'This is my home!' Other birds can hear them.

Some birds sing to find a friend. A sweet song can help!

Do you hear birds in the morning? Listen next time. It is so cool!

Why Do Snails Move So Slowly?

By Leo · 2026-08-24 · 79 words · L2

달팽이는 왜 느리게 갈까

Snails are very small animals. They have a soft body and a hard shell.

Snails move on their belly. Their belly squeezes and stretches to move. This is very slow!

Snails also make slime. The slime helps them slide on the ground. But making slime takes a lot of work.

Being slow can be good! When danger comes, snails hide in their shell. They stay safe inside.

Isn't that so cool? Snails are slow, but they are very smart!

한글 요약

달팽이는 배로 천천히 움직이고, 끈적한 액체를 만들어 미끄러지듯 나아가요. 위험할 때는 딱딱한 껍데기 안에 숨어서 몸을 지켜요.
