How Does Sound Get Into Your Ear?

By Leo · 2026-09-28 · 57 words · L2

소리는 어떻게 귀에 올까

Sound travels through the air. It moves like tiny waves.

The waves go into your ear. Your ear has a small hole.

Deep inside, there is a tiny part called the eardrum. It shakes when sound hits it!

Then your brain gets the message. That is how you hear!

Isn't your ear amazing? It works every day.
