How Do Big Planes Fly?

By Leo · 2026-07-30 · 60 words · L3

비행기는 어떻게 하늘을 날까

Have you ever seen a big plane in the sky?

A plane has long, flat wings. The wings help the plane go up.

Air moves under the wings. It pushes the plane up high!

The engine makes the plane go fast. Fast air helps the plane stay up.

Isn't that so cool? You can fly too — on a plane!
